WEEK 5 | DAY 3 | WED NOV 4

Advanced Flow and AI Short.

Build a 45 second short from start to finish.

10:00 a.m. - 12:00 p.m. | Multan Office

Instructor Muhammad Farukh F.

TODAY'S AGENDA

Two hours, eight steps.

10:00	Recap: twin and characters	10 min
10:10	Scene extension and camera control	10 min
10:20	Audio and polish	25 min
10:45	Short break	10 min
10:55	Plan your 45 second short	20 min
11:15	Generate and assemble	20 min
11:35	Hands on	15 min
11:50	Quick check and recap	10 min

GOAL

A 45 second AI short.

- Use your storyboard, character or twin
- Generate 6 to 8 clips of 5 to 8 seconds
- Edit them in Premiere with music and captions
- Export a clean 1080p MP4

Remember

Quality beats quantity. Fewer, better shots win.

SCENE EXTENSION

Make a clip longer.

- Extend a good clip to continue the action
- Start from the last frame of the clip
- Keep the same description and style
- Check that motion stays smooth

Note

Tool names and options change. Check the live Flow screen.

CAMERA CONTROL

Direct the camera.

- Name the shot: wide, medium, close up
- Name one move: push in, pan, tracking, orbit
- Keep one idea per clip
- Match camera moves from shot to shot

Example

Slow tracking shot following the character through a market, wide, warm light, 8 seconds.

AUDIO

Sound makes it real.

- Ask for ambient sound in the prompt
- Add music and effects in Premiere
- Duck the music under any voice
- Keep voice peaks between -12 and -6 dB

Tip

Silent clips feel fake. Layer sound in the edit.

PRODUCTION PLAN

From idea to export.

1 Plan

Story and storyboard

2 Generate

6 to 8 clips

3 Select

Keep the best takes

4 Edit

Cut, color, music, captions

5 Export

1080p MP4

6 Review

Check with a friend

QUALITY CHECK

Before you edit.

- Same character in every clip
- No odd hands, faces or text
- Style and light match across shots
- Motion is smooth, not jittery

Habit

Name your files: Shot01_Hook, Shot02_Detail and so on.

EDITING THE SHORT

Premiere workflow.

- Import and organize clips in bins
- Rough cut to the music beat
- Match color with Lumetri
- Add captions and a title, then export

Remember

Use everything from Weeks 1 and 2: cuts, color, audio, titles.

RESPONSIBLE USE

Be honest.

- Tell viewers when AI made the video
- Do not show real people without consent
- Check every clip for misleading details
- Keep your prompts and settings

Rule

AI should serve your story, not mislead viewers.

HANDS ON

Make your short.

- [ ] Finalize your storyboard: 6 to 8 shots
- [ ] Generate and select your clips
- [ ] Extend one clip and compare
- [ ] Assemble the edit in Premiere
- [ ] Add music, captions and a title
- [ ] Export and save as Short_v01.mp4

QUICK CHECK

Five questions.

- [ ] What is scene extension?
- [ ] Name two camera moves
- [ ] Why do we check consistency before editing?
- [ ] What audio level suits voice?
- [ ] Why tell viewers about AI use?

RECAP

What you learned today.

Covered

- Scene extension and camera control
- Audio and production plan
- Assembling the short

Homework

- Finish your 45 second short
- Share it for review
- Bring your diary

Next class

- Higgsfield Essentials
- Camera motion and characters
- Product ads and scenarios
