WEEK 5 | DAY 4 | THU NOV 5

Higgsfield Essentials.

An overview of what it can do and where it fits.

10:00 a.m. - 12:00 p.m. | Multan Office

Instructor Muhammad Farukh F.

TODAY'S AGENDA

Two hours, eight steps.

10:00	Recap: Flow and AI shorts	10 min
10:10	What is Higgsfield?	10 min
10:20	Camera motion and characters	25 min
10:45	Short break	10 min
10:55	Product ads and social clips	20 min
11:15	Higgsfield vs Flow	20 min
11:35	Hands on	15 min
11:50	Quick check and recap	10 min

WHAT IS IT

An AI platform for image and video.

- Higgsfield offers AI image and video tools in one place
- It is popular for camera motion effects and character work
- It supports product and social content workflows
- Features, models and pricing change often

Note

Check the live site and your own account before class.

CAPABILITIES

What can you create?

- Videos from text or from a still image
- Cinematic camera moves with presets
- Characters that stay consistent across shots
- Product ads and short social clips

Remember

Start from a strong image, then add motion.

CAMERA MOTION

Presets for movement.

- Choose a camera motion preset
- Examples: push in, orbit, pull out, handheld
- Try several presets on the same image
- Pick the move that fits the story

Tip

Subtle movement usually looks more professional.

CHARACTERS

Keep a face consistent.

- Create or upload a character reference
- Reuse it across clips
- Follow the platform rules on real people
- Use your own images or ones you have rights to

Rule

Consent first, always.

SCENARIOS

Where it works well.

- Product promo: one product, three moves
- Character reel: a short story in several clips
- Social hooks: strong opening visuals
- Concept shots: ideas for a client pitch

Example

A steel water bottle, close up, slow orbit, soft studio light, 6 seconds.

PROMPTING

Use the video formula.

- Shot and subject
- Action and scene
- Style, light and mood
- Camera motion and length

Reminder

The same prompt anatomy from Week 3 works here too.

HIGGSFIELD VS FLOW

Choose the right tool.

Storytelling

Flow suits scene by scene stories

Camera presets

Higgsfield offers ready motion presets

Speed

Test both for your task

Cost

Compare credits and plans

Control

Compare character and edit control

Rule

Test the same prompt in both

RESPONSIBLE USE

Create honestly.

- No fake videos of real people
- Check the final clip frame by frame
- Tell clients when AI was used
- Respect brand logos and copyright

Rule

Your reputation depends on honest work.

HANDS ON

Make a product clip.

- [ ] Create or choose a product image
- [ ] Pick two camera motion presets
- [ ] Generate and compare both clips
- [ ] Write your best prompt in your library
- [ ] Pick the better one and note why
- [ ] Save the clip and settings

QUICK CHECK

Five questions.

- [ ] What is a camera motion preset?
- [ ] Name two uses for Higgsfield
- [ ] Why start from a strong image?
- [ ] How do you compare two tools fairly?
- [ ] Name one responsible use rule

RECAP

What you learned today.

Covered

- What Higgsfield offers
- Camera motion and characters
- Scenarios and comparison with Flow

Homework

- Make two product clips
- Compare Higgsfield with Flow
- Bring your diary

Next class

- Canva images, video and slides
- Export to Premiere
- Weekly test
