WEEK 2 | DAY 2

# Masks and Structure.

AI Object Mask, tracking, nesting, adjustment layers and multicam.

**10:00 a.m. - 12:00 p.m. | Multan Office**

Instructor Muhammad Farukh F.

WELCOME BACK

# Last class in 30 seconds.

- [ ] Correct, match, then grade
- [ ] Lumetri sections and scopes
- [ ] Curves and HSL secondary
- [ ] Color matching and adjustment of shots
- [ ] Keyframes for scale, position and opacity

TODAY'S AGENDA

# Two hours, nine steps.

| | | |
|---|---|---|
| 10:00 | Recap and questions | 10 min |
| 10:10 | Mask basics | 20 min |
| 10:30 | Mask tracking | 15 min |
| 10:45 | Short break | 10 min |
| 10:55 | AI Object Mask | 20 min |
| 11:15 | Nesting and adjustment layers | 15 min |
| 11:30 | Multicam introduction | 10 min |
| 11:40 | Hands on: isolate and track | 15 min |
| 11:55 | Recap and homework | 5 min |

WHY MASKS

# Limit an effect to one area.

## Brighten a subject

Add light on a face only

## Blur a background

Keep focus on the person

## Hide private details

Blur faces or license plates

## Reveal a title

Wipe text in with a mask

MASK BASICS

# Draw it, soften it.

- Open Effect Controls and pick any effect
- Choose the Ellipse, 4-point or Pen mask tool
- Mask Feather softens the edge
- Mask Expansion grows or shrinks it
- Invert flips what is inside and outside

TRACKING

# Make the mask follow.

1

## Create

Draw the mask on the first frame

>

2

## Track forward

Use the forward arrow in mask options

>

3

## Check

Scrub through the clip

>

4

## Fix

Adjust keyframes where it drifts

AI OBJECT MASK

# One click selects the subject.

1

## Select tool

Choose the Object Mask tool

>

2

## Hover

Move over the person or object

>

3

## Click

Premiere creates the mask

>

4

## Track

Track forward and refine

Available in recent versions of Premiere. Check your version.

USING MASKS

# Combine masks with effects.

### Lumetri on a mask

Grade the subject only

### Blur outside

Soften a busy background

### Color pop

Desaturate everything else

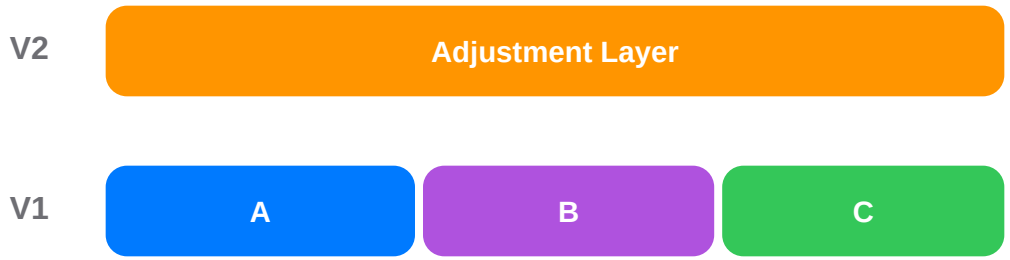
### Privacy blur

Hide faces and plates

ADJUSTMENT LAYERS

# One layer, many clips.

- Project panel > New Item > Adjustment Layer
- Drag it above your clips on V2
- Stretch it to cover the clips you want
- Any effect on it affects all clips below
- Great for a grade or a vignette

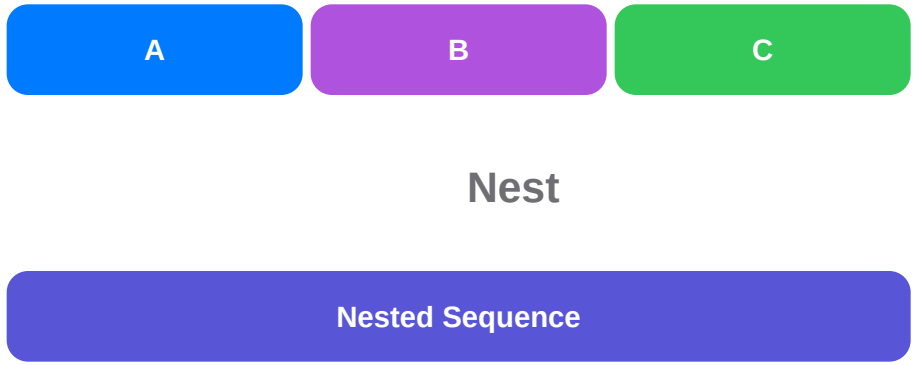


One effect, all three clips

NESTING

# Group clips into one.

- Select clips, right click, Nest
- Name the nested sequence clearly
- Apply one effect to the whole group
- Double click to open and edit inside
- Keeps a busy timeline tidy



MULTICAM

# Cut between camera angles.

- Select all angle clips
- Right click > Create Multi-Camera Source Sequence
- Synchronize by audio
- Open the multicam view in the Program Monitor
- Press 1, 2 or 3 while playing to switch angles

## Why use it

Interviews, events and podcasts shot with two or more cameras are edited much faster, because angles stay in sync.

HANDS ON

# Isolate and track a subject.

- [ ] Place one clip on V1
- [ ] Add Lumetri and draw a mask on the subject
- [ ] Track the mask forward and fix any drift
- [ ] Grade only the masked subject
- [ ] Add an adjustment layer with a gentle vignette
- [ ] Save as v08

QUICK CHECK

# Five questions.

- [ ] What does a mask do?
- [ ] What does Mask Feather change?
- [ ] How do you make a mask follow movement?
- [ ] What is an adjustment layer used for?
- [ ] When would you use multicam?

RECAP

# What you learned today.

## Covered

- Mask basics and feather
- Mask tracking
- AI Object Mask
- Adjustment layers, nesting, multicam

## Homework

- Mask and grade a subject in your own clip
- Try nesting three clips
- Bring your diary next class

## Next class

- AI Captions and Reframe
- Speech to Text, Translate Captions
- Auto Reframe and Scene Edit Detection
