WEEK 2 | AI FEATURES

AI Captions and Reframe.

Speech to Text, Translate Captions, Auto Reframe and more.

10:00 a.m. - 12:00 p.m. | Multan Office

Instructor Muhammad Farukh F.

TODAY'S AGENDA

Two hours, eight steps.

10:00	Recap and questions	10 min
10:10	Why captions matter	10 min
10:20	Speech to Text	25 min
10:45	Short break	10 min
10:55	Translate Captions	15 min
11:10	Auto Reframe	20 min
11:30	Scene Edit Detection and search	15 min
11:45	Hands on and recap	15 min

WHY CAPTIONS

Most people watch on mute.

- Social videos often play without sound
- Captions help viewers who cannot hear
- They hold attention and raise watch time
- Clear captions look professional

Rule

Every short video you publish should have captions.

SPEECH TO TEXT

Turn voice into text.

- Open Window > Text
- Click Transcribe sequence and pick the language
- Read the transcript and fix wrong words
- Click Create captions to add them to the timeline

Tip

Use a clean voice. Good audio gives a more accurate transcript.

CAPTION STYLE

Make captions easy to read.

- Choose a clear, bold font
- Use high contrast: white text with a dark background
- Keep to two short lines
- For 9:16 videos, keep captions above the bottom app buttons

Remember

Style one caption track, and it applies to all of them.

TRANSLATE

Reach more viewers.

- Select your caption track
- Choose Translate Captions and pick the target language
- Review the result, since AI can miss meaning
- Export the captions, or burn them into the video

Check

Ask someone who speaks the language to review important videos.

AUTO REFRAME

One video, many shapes.

- Duplicate your sequence first
- Sequence > Auto Reframe Sequence
- Choose 9:16, 1:1 or 4:5
- Pick a motion preset: Slower, Default or Faster
- Check the result and fix any shots where the subject is cut off

Why use it

Turn a 16:9 YouTube video into a Reel or Short in minutes.

SCENE EDIT DETECTION

Find cuts in long clips.

- Right click a clip and choose Scene Edit Detection
- Premiere finds where shots change
- Choose to add cuts or markers
- Useful for old edits and long recordings

Tip

Add cuts, then delete or move the parts you do not need.

SEARCH

Find footage faster.

- Media Intelligence can search clips by what is in them
- Type a word such as "street" or "tea" to find matching shots
- The feature depends on your Premiere version
- Keep clips named and organized, too

Note

Check your version of Premiere. Adobe keeps adding AI features.

HANDS ON

Caption and reframe a clip.

- [ ] Place a 30 second clip with speech on the timeline
- [ ] Transcribe and fix the transcript
- [ ] Create captions and style them
- [ ] Translate the captions into one other language
- [ ] Duplicate the sequence and Auto Reframe to 9:16
- [ ] Check captions in the safe zone and save as v09

RECAP

What you learned today.

Covered

- Speech to Text and caption style
- Translate Captions
- Auto Reframe, Scene Edit Detection

Homework

- Caption your mini project
- Make a 9:16 version
- Bring your diary

Next class

- Generative AI in Premiere
- Generative Extend
- Firefly and Paper Edit
