WEEK 2 | AI FEATURES

Generative AI in Premiere.

Generative Extend, Generative Media, Paper Edit and responsible use.

10:00 a.m. - 12:00 p.m. | Multan Office

Instructor Muhammad Farukh F.

TODAY'S AGENDA

Two hours, eight steps.

10:00	Recap and questions	10 min
10:10	What is generative AI?	10 min
10:20	Generative Extend	25 min
10:45	Short break	10 min
10:55	Generative Media tool	20 min
11:15	Paper Edit	15 min
11:30	Prompts and responsible use	15 min
11:45	Hands on and recap	15 min

THE BASICS

What is generative AI?

- AI that creates new content from a short description
- Examples: images, video clips, audio and text
- Adobe Firefly powers many of Premiere's AI tools
- It helps with small fixes, but it is not magic

Remember

AI is a helper. You still decide what fits your story.

GENERATIVE EXTEND

Make a clip a little longer.

- Use it when a clip is a few frames too short
- Drag the end of the clip with the Generative Extend tool
- Premiere creates the extra frames and matching sound
- Review the result. Check faces, hands and motion

Best for

Fixing timing gaps, holding a shot longer, or matching a music beat.

GENERATIVE MEDIA

Create a clip from words.

- Describe the shot you need in a short prompt
- Choose the type of clip: video or image
- Review the options and pick the best one
- Place it on your timeline as B-roll

Note

This tool is new and depends on your Premiere version and credits. Check before class.

PAPER EDIT

Edit by editing text.

- Transcribe your footage first
- Select sentences in the transcript
- Add them to the timeline in your chosen order
- Great for interviews and long talks

Why it helps

You can build a rough cut by reading, not by scrubbing through video.

PROMPTS

Write clear prompts.

- Say what is in the shot: subject and place
- Add the look: light, mood and style
- Add the camera: close up, wide, slow
- Keep it short and specific. Try again if needed

Example

A cup of tea on a wooden table, morning light, close up, steam rising.

RESPONSIBLE USE

Use AI honestly.

- Content Credentials show how a file was made
- Tell clients when AI was used
- Do not create fake people or misleading news
- Check the result. Never publish without review

Rule

Use AI to save time and help the story, never to mislead viewers.

HANDS ON

Try one AI tool.

- [ ] Place a short clip on the timeline
- [ ] Extend its end slightly with Generative Extend
- [ ] Check the result frame by frame
- [ ] Transcribe an interview and try a Paper Edit
- [ ] Write one prompt for a B-roll clip and review it
- [ ] Save as v10

RECAP

What you learned today.

Covered

- Generative Extend
- Generative Media tool
- Paper Edit and prompts

Homework

- Extend one clip
- Write three clear prompts
- Bring your diary

Next class

- AI Assistant
- Build a reel with 4 AI features
- Quiz
