WEEK 3 | DAY 2

Prompt Anatomy.

The seven parts of a strong image or video prompt.

10:00 a.m. - 12:00 p.m. | Multan Office

Instructor Muhammad Farukh F.

TODAY'S AGENDA

Two hours, eight steps.

10:00	Recap and questions	10 min
10:10	What is a prompt?	10 min
10:20	Subject, scene and style	25 min
10:45	Short break	10 min
10:55	Camera, lighting and mood	20 min
11:15	Negatives and weak vs strong	15 min
11:30	Hands on: build a prompt	20 min
11:50	Quick check and recap	10 min

THE BASICS

What is a prompt?

- A prompt is the instruction you give an AI tool
- AI makes what you describe, not what you imagine
- More clear detail means a better result
- Today we learn the parts of a good prompt

Remember

The AI cannot see your mind. Describe the picture clearly.

WHY IT MATTERS

Vague in, vague out.

Weak prompt

A tea cup.

Strong prompt

A steaming cup of tea on a wooden table by a window, cinematic photo, close up, warm morning light, calm and cozy mood. No text.

Same idea. Very different result.

THE ANATOMY

Seven parts of a prompt.

Subject

Who or what

Scene

Where it is

Style

Photo, cartoon, cinematic

Camera

Shot and angle

Lighting

The light

Mood

The feeling

Negatives

What to avoid

SUBJECT AND SCENE

Who or what, and where.

- Subject: the main person, object or animal
- Add details: age, color, clothing, action
- Scene: the place and the time of day
- Add background details: street, office, forest

Example

A young video editor working on a laptop, in a bright office, in the afternoon.

STYLE

Choose the look.

- Photo: realistic, product photo, portrait
- Cinematic: movie like, rich color and depth
- Illustration: cartoon, watercolor, flat design
- 3D: render, clay, glossy and modern

Tip

Pick one clear style. Mixing many styles confuses the result.

CAMERA AND LIGHTING

Frame it and light it.

- Shots: wide, medium, close up
- Angles: eye level, low angle, top down
- Light: soft, golden hour, studio, dramatic
- Camera for video: slow push in, pan, tracking

Example

Close up, low angle, warm golden hour light, shallow depth of field.

MOOD AND NEGATIVES

Feeling and limits.

- Mood: calm, joyful, serious, bold, mysterious
- Mood changes color and light choices
- Negatives: say what you do not want
- Examples: no text, no watermark, no extra people

Example

Calm and cozy mood. No text, no watermark, no blur.

BUILD IT

Add one part at a time.

Subject	A cup of tea
Scene	+ on a wooden table by a window
Style	+ cinematic photo
Camera	+ close up
Lighting	+ warm morning light
Mood	+ calm and cozy
Negatives	+ no text, no watermark

HANDS ON

Build your own prompt.

- [ ] Pick a topic: tea, rain, street food or a city
- [ ] Write the subject and the scene
- [ ] Add style, camera and lighting
- [ ] Add mood and two negatives
- [ ] Generate it in Gemini or ChatGPT
- [ ] Change one part and compare the two results

QUICK CHECK

Five questions.

- [ ] Name the seven parts of a prompt
- [ ] What is the difference between style and mood?
- [ ] Give two examples of a camera shot
- [ ] Why do we add negatives?
- [ ] Rewrite "a dog" as a strong prompt

RECAP

What you learned today.

Covered

- The seven parts of a prompt
- Weak vs strong prompts
- Building a prompt step by step

Homework

- Write five prompts with all seven parts
- Test two in an AI tool
- Bring your diary

Next class

- Prompt Structure and Frameworks
- Order and the seven block formula
- CORE-X for chat prompts
