WEEK 3 | DAY 5

Video Prompt Anatomy.

Shots, camera moves, motion, timing and sound.

10:00 a.m. - 12:00 p.m. | Multan Office

Instructor Muhammad Farukh F.

TODAY'S AGENDA

Two hours, eight steps.

10:00	Recap: image prompts	10 min
10:10	Image vs video prompts	10 min
10:20	Shots and camera movements	25 min
10:45	Short break	10 min
10:55	Motion, timing and audio cues	20 min
11:15	The video prompt formula	15 min
11:30	Hands on: build your prompt library	20 min
11:50	Quick check and recap	10 min

WHAT CHANGES

From a picture to a clip.

- An image prompt describes one moment
- A video prompt adds movement, time and sound
- Keep the same parts: subject, scene, style, light and mood
- Add: action, camera movement, length and audio

Remember

Ask for one clear action and one clear camera move per clip.

THE ANATOMY

Eight parts of a video prompt.

Subject
Who or what

Action
What happens

Scene
Where and when

Style
Cinematic, realistic, cartoon

Camera
Shot type and angle

Movement
Push in, pan, tracking

Light and mood
The look and feeling

Length and audio
Seconds, music, sounds

SHOT TYPES

Choose the right shot.

Wide

Shows the whole place

Medium

Shows a person to the waist

Close up

Shows detail or emotion

Over the shoulder

Good for conversations

Low angle

Makes a subject look strong

Aerial or drone

Big view from above

CAMERA MOVES

Tell the camera how to move.

Static
The camera does not move

Pan
Turns left or right

Tilt
Turns up or down

Push in
Moves slowly closer

Pull out
Moves slowly away

Tracking
Follows the subject

Orbit
Circles around the subject

Handheld
Natural, slightly shaky look

MOTION AND TIMING

One idea per clip.

- Describe one clear action, such as steam rising
- Add speed: slow motion, normal, time lapse
- Short clips of 4 to 10 seconds work best in most tools
- Plan a sequence of shots, like a small storyboard

Tip

Several simple clips edit together better than one complicated clip.

AUDIO CUES

Add sound to the picture.

- Ambient sound: rain, wind, city noise
- Music: soft piano, upbeat, calm
- Effects: footsteps, door, water pouring
- Not every tool makes sound. Check yours first

Example

Close up of rain on a window, gentle rain sound, soft piano.

THE FORMULA

Build a video prompt.

Shot close up	**Subject** a cup of tea	**Action** steam rising	**Scene** wooden table
Style cinematic	**Move** slow push in	**Light** warm morning	**Audio** soft piano, 8 sec

Final prompt

Close up of a cup of tea on a wooden table, steam rising, cinematic style, warm morning light, slow push in, soft piano music, 8 seconds.

EXAMPLES

Five video prompts.

1 Close up	Slow push in on a cup of tea on a wooden table, steam rising, cinematic style, shallow depth of field, warm morning light, soft piano music, 8 seconds.
2 Drone	Aerial drone shot over green fields at sunrise, a train crossing in the distance, slow forward movement, golden light, peaceful mood, sound of wind, 10 seconds.
3 Vertical	Close up of rain drops on a window, blurred city lights behind, static camera, cool blue tones, gentle rain sound, 6 seconds, vertical 9:16.
4 Product	A steel water bottle rotating slowly on a white table, product video, close up, soft studio light, clean modern mood, smooth orbit camera, 6 seconds.
5 Time lapse	Time lapse of a busy city street from day to night, wide shot, fixed camera, headlights and street lights glowing, city sounds, 10 seconds, 16:9.

PROMPT LIBRARY

Your prompt library.

No.	Type	Prompt	Tool	Rating
1				
2				
3				
4				
5				
6				
7				

Goal today: 10 image prompts and 5 video prompts saved in your library.

HANDS ON

Build your prompt library.

- [ ] Write 5 video prompts with all eight parts
- [ ] Add one camera move and one sound to each
- [ ] Test two prompts in Gemini, Flow or another video tool
- [ ] Improve one prompt and compare the results
- [ ] Collect your 10 image and 5 video prompts in one file
- [ ] Save the file as Prompt_Library_YourName

QUICK CHECK

Five questions.

- [ ] What do we add to an image prompt to make a video prompt?
- [ ] Name three shot types
- [ ] Name two camera movements
- [ ] Why keep one action per clip?
- [ ] Give one example of an audio cue

RECAP

Week 3 in review.

This week

- Prompt anatomy and structure
- CORE-X for chat prompts
- Image and video prompts

Homework

- Finish your prompt library
- Try one prompt in two tools
- Bring your diary

Next week

- Gemini and ChatGPT images
- Prompt debugging
- Introduction to Google Flow
