WEEK 4 | DAY 1

Gemini Image Model.

Generate, edit, blend and keep characters consistent.

10:00 a.m. - 12:00 p.m. | Multan Office

Instructor Muhammad Farukh F.

TODAY'S AGENDA

Two hours, eight steps.

10:00	Recap: prompt anatomy and CORE-X	10 min
10:10	Meet the Gemini image model	10 min
10:20	Generate your first images	25 min
10:45	Short break	10 min
10:55	Conversational edits	20 min
11:15	Blending images and consistent characters	20 min
11:35	Hands on: create a mini image set	15 min
11:50	Quick check and recap	10 min

MEET GEMINI

Images from a chat.

- Open gemini.google.com and sign in with a Google account
- Ask for an image in plain words
- Gemini can also edit a photo you upload
- Free accounts have daily limits, and features change often

Note

Check your own account. Tools and limits depend on your country and plan.

FIRST IMAGE

Four steps to a result.

1 Open

Start a new chat in Gemini

2 Write

Use the seven part prompt

3 Review

Check the subject, light and text

4 Refine

Change one thing at a time

PROMPT RECIPE

Use the seven parts.

- Subject and scene first
- Then style, camera and lighting
- Add the mood and what to avoid
- Add the shape: 16:9, 9:16 or 1:1

Example

A cup of tea on a wooden table by a window, cinematic photo, close up, warm morning light, calm mood, 16:9. No text.

CONVERSATIONAL EDITS

Talk to change the image.

- Ask for one change per message
- Say what to keep: "keep the person the same"
- Examples: change the background, add light, remove an object
- If it goes wrong, go back and rephrase

Example

Keep the person and the desk exactly the same. Change the background to an evening city view.

YOUR OWN PHOTOS

Upload and edit.

- Upload a photo and describe the edit
- Good for backgrounds, thumbnails and cleanup
- Only edit photos you own or have permission to use
- Check faces and hands in the result

Remember

Never edit or share another person's photo without their permission.

BLENDING

Combine two or three images.

- Upload the images you want to combine
- Say which image is which: product, background, person
- Describe light, position and shadows
- Review the edges and reflections

Example

Use the first image as the product and the second as the background. Place the bottle on the table in soft studio light.

CONSISTENT CHARACTER

Same character, new scenes.

- Describe the character in detail: age, hair, clothes
- Keep the same chat for the next images
- Say "same character" and change only the scene
- Reuse the description in every new prompt

Example

A friendly man, short black hair, glasses, green hoodie. Next: same character, now at a laptop in a cafe.

EXAMPLES

Five Gemini prompts.

1 Generate	A young video editor at a desk with two monitors, bright modern office, lifestyle photo, medium shot, soft window light, focused mood, 16:9. No text, no watermark.
2 Edit	Keep the person and the desk exactly the same. Change the background to an evening city view and make the lighting warm.
3 Blend	Use the first image as the product and the second image as the background. Place the bottle on the table in soft studio light with realistic shadows.
4 Character	Create a cartoon character: a friendly 25 year old man with short black hair, glasses and a green hoodie. Waving, full body, white background.
5 Thumbnail	YouTube thumbnail, 16:9: a surprised creator holding a camera, bright yellow background, empty space on the left for text, high contrast.

RESPONSIBLE USE

Create honestly.

- Check any text inside the image for spelling
- Do not create fake images of real people
- Tell clients when an image is made with AI
- AI images may carry an invisible watermark

Rule

Use AI to help your story, not to mislead viewers.

HANDS ON

Create a mini image set.

- [ ] Generate one image with all seven prompt parts
- [ ] Edit it with two separate messages
- [ ] Blend two images into one scene
- [ ] Create a character and show it in two scenes
- [ ] Save your best three images in a folder
- [ ] Write down the prompt for each one

QUICK CHECK

Five questions.

- [ ] What is a conversational edit?
- [ ] Why change only one thing per message?
- [ ] How do you keep a character consistent?
- [ ] What should you say when blending images?
- [ ] Name one rule for responsible AI use

RECAP

What you learned today.

Covered

- Generating images in Gemini
- Conversational edits
- Blending and consistent characters

Homework

- Make 5 images with your own prompts
- Try one blend and one edit
- Bring your diary

Next class

- ChatGPT Image Generation
- Text in images and logos
- Reference images and edits
